Been playing this since the PSX, always loved the graphical style and 2.5D gameplay. May not be for everyone, it has not aged well visually. I am just happy to see more and more of games like these making it to Steam.. I adore this game. It has charm similar to that of Stardew Valley. There isn't a ton to do, but what you can do is super fun. There are people to help or hurt, villages to take over (or not), many sea battles to take part in, and ships to expand into. Definitely worth the price.. A vivid and bold art style that pays homage to classics like Metal Slug and more modern games like Cuphead. The difficulty is paced properly and a level up system is present, allowing options like increase you ship speed to gaining an extra life. I would recommend this to shmup fans and players who are interested in the genre and looking for a starting game.. So far this has been an amazing game, almost like a combo of Kerbal Space Program and Titan A.E, with a bit of ridiculousness involving bombing stations with igloos and oversized boxing gloves. Although it's currently short on content, it's dynamic destruction and generally fun gameplay give it tons of replay value at the moment. Definitely buy!

TL;DR: Kerbal Space Katamari.. LOVE IT. It is my current productivity killer.

- Lots of good old fashion simple fun.
- Good difficulty progression .
- Doesn't take itself to seriously. The AI bot provides a bit of comendy without being over bearing.
- Clever level design with lots of variety
- Fun theme.

I am constantly on the look out for these types of games.
Highly recommended.. if you are looking for dog fighting this is your game.

If the game has Hitler and Lord Gaben, give it a 10/10.. Can't knock it. For \$2 you get about 2 hours of "gameplay". Just set the character speed to 40 and hit play. It's like an anime, but with less artwork and animation. I say it was \$2, but when you factor in the value of the cards I got, it comes out to 83 cents. This is a game where, if you get lucky and get a rare card, you can actually profit.

Storywise, it's a vanilla love story. Nothing really exciting happens and literally 3 of the characters are actually ever shown.

And no, there is no 18+ patch or anything like that.. This is like a very fast, mobile (and agile) version of Skyfront! Maps are beautiful in a cartoony sort of style, and the movement mechanic is much quicker than in Skyfront - it feels kind of like the mobility in Sprint Vector (no arm-swinging, however - you use airguns in both hands similar to Skyfront). Great feeling game!

I wish there were people online to play against - the bots are a lot of fun but a community is really what this game needs. My suggestion - give a free trial license to some arcades, maybe set up some tournament events or something.. ANOTHER GOOD IDEA DESTROYED BY POOR GAME CONTROLS FEATURES:

I hated this game controls features and the tabs seem to work fine to order the villagers to work but to get direct control of a villager for direct action it seem to work not that well or it was just too hard to understand how to do it. Without any tutorial to help understand this game is not that fun the way it works do to poor key control and no cool click and click to build or battle enemy. There are way to many game that work fine an this game has way to of basic game design control to even pass as a good game, these issue have been done away with way back in far older game design features.

There was no click on each character tab of each villager a separate tab of each person the controls where so ignorant to even use that I found myself getting so angry at the game the whole idea that seem to be so cool just diminished to I give up.. I may be a little biased because I've never really been a fan of racing games but I know a poorly made game when I see one and god is this one of them. The graphics are subpar and the game doesn't even do anything to make up for that, it's just your typical bare bones racing game. For some reason they felt the need to not have standard controls and don't have a tutorial or even a place on the menu to tell you what the controls are or how the game works. Your car also seems to just blow up randomly I'm still not sure why.

Don't even waste your time on this game even if you enjoy racing.. Its what youve always wanted. Interesting Idea
+Okay Price

- Badly developed
- Guns feel like peashooters
- Gives an achievement "Headshot!" But headshots do as much damage as bodyshots.
- Not good

1/5

Decent price, interesting Idea, terribly made. Nothing in this game feels good aside from the idea. It's like you're shooting a Nerf gun and your enemies fall down because they pity you.

. This is for the fans of anachronistic, reference-laden, high-brow (somewhat) humor that is largely derived from a reading experience.

So for those that enjoy this kind of wit, it is unbelievably entertaining, and an absolute must-have. But for those that don't, I imagine it would seem quite boring.

Take-home lesson: know thyself, bro.

I would, however, suggest a sale purchase--at times it seems too minimalistic to justify the \$12 price tag. I loved it all the same, however, and continue to open it up whenever I'm feeling like a clever, light-hearted narrative.. Sorry, but I want my money back. This game is a cuddly rabbit game, which is pretty nice in the first level. Getting to the second level you recognize that you can't get through this without hating anyone who made it. I tried the same point nearly 20 times but jumping and walking is

a difficult thing at some points. if you press "jump" it can be that it works or you get an annoying sound or the rabbit jumps after 5 seconds. This is pretty useless in a jump and run game.
